słowa kluczowe

order confirmation potwierdzenie zlecenia "silent mode" "po cichu"

Objaw (publiczny)

Problem (publiczny)

CUTTER creates as many mail client's windows as many confirmed orders. I dont want te see clients mail confirmation dialogue. How to diable this and allow CUTTER to send mail sillently?

Rozwiązanie (publiczny)

To disable mail message confirmation window(dialogue) you need to have cutmail.exe application in version 1.1. You need to edit Windows registry.
In
HKEY_CURRENT_USER\Software\SIP\Cutter2000\Cutmail
create new value of type DWORD named PreviewMsg and set its value to 0.

After setting this all orders confirmation mails will be sent without any confirmation - in silent mode.
